# **PRESENT ENVIRONMENTAL STATUS OF NAJAFGARH DRAIN BASIN**

## **1.0 Introduction**

After analyzing the Environmental Status of Industrial Clusters of the country, Central Pollution Control Board in consultation with the Ministry of Environment & Forests has identified 88 critically polluted industrial clusters, of which Najafgarh Drain Basin including Wazirpur, Naraina, Anand Parbat and Okhla industrial areas is one of them in NCT of Delhi.

## **1.1 GEOGRAPHICAL FEATURES**

### **Location**

The National Capital Territory of Delhi is stretched over an area of 1483 sq km. As far as the location of Delhi is concerned, it stands in the middle of the Indian sub-continent, between the Himalayas and Aravallis range. Bordered by Haryana in the east and by Uttar Pradesh across the river Yamuna, Delhi is located approximately 213 to 305 m above the sea level. It is around 33 miles and 30 miles broad and extends latitude 28.38°N and longitude 77.12°E.

The location of Delhi is such that a major part of the city falls on the western side of the Yamuna River. Apart from Yamuna, which is the main river of the city, there are 3 canals, Agra Canal, Hindon Canal and western Yamuna Canal. Geography of Delhi has divided it into 3 segments. The three segments consist of the Yamuna flood plain, the

Ridge and the Plain. The low lying and flood prone area of Yamuna flood plains is also known by the name of Khadar.

The area of the Ridge stretches from the Aravalli hills, encircling the city on the northwest and west. One of the highlights of the Ridge area is the Tughlaquabad Fort that stands at its highest point. The Plains consist of all the area of Delhi, apart from the Yamuna flood plain and the Ridge. Majority of the city area, consisting of Delhi, New Delhi and Delhi cantonment, falls in the fertile land of the Plains.

### **Topography**

The topography of Delhi can be divided into three different parts, the plains, the Yamuna flood plain, and the ridge. As per the topography, Delhi is located on the western fringes of the Gangetic Plains. The low altitude Yamuna flood plains provides an excellent scope of agriculture, as it is covered with the fertile alluvium brought by the river Yamuna and deposited here during the frequent floods. The other topographical feature is the Ridge, which reaches the height of 1043 ft above sea level, and is the highest point in Delhi. The ridge originates in the south and surrounds its western, the northwestern and northeastern part. It is a part of the Aravalli Hills.

### **Climate**

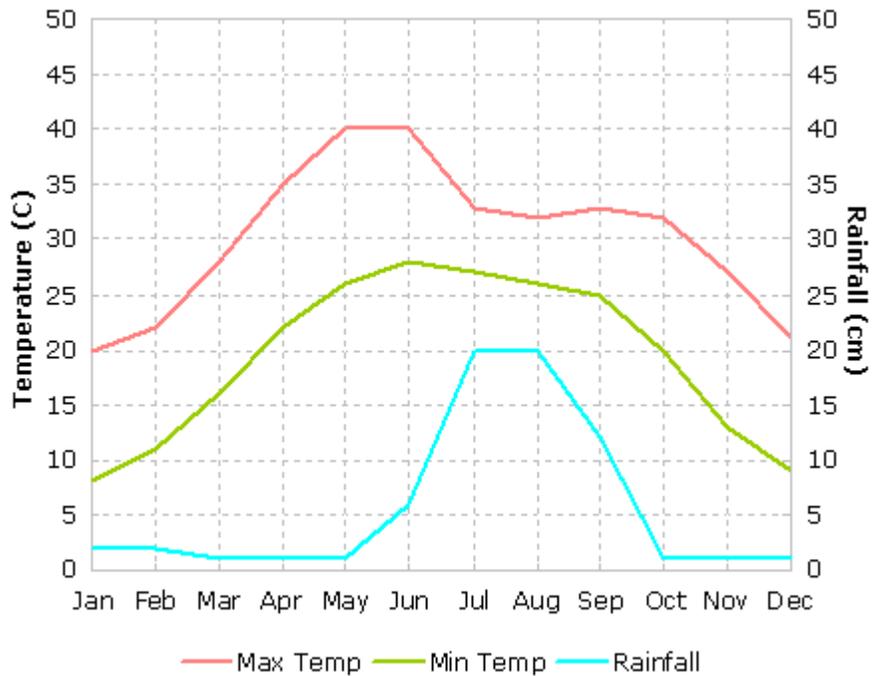

The climate of Delhi is one of the most varied and purely depends upon the climate of nearby areas of Himachal Pradesh, Rajasthan etc. Delhi experiences the extremes of weather. This is because of the geological location of Delhi. The climatic conditions of Delhi are similar to that of the temperate grasslands with hot, dry summers, and cold winters. The summers in Delhi start from the month of April and continue till

the month of July. It is very hot and dry in the summer months, with temperature soaring up to 45o C. The rainy season provides relief from searing heat and continues till the month of October. The humidity levels very high in Delhi at this time of the year. The winter months are characterized by dip in the temperature levels often reaching 5o C or less than that.

**Rainfall**

The city does not witness much of rainy season. The monsoon lasts from July to September. October sees the end of the monsoon but it is reasonably pleasant.

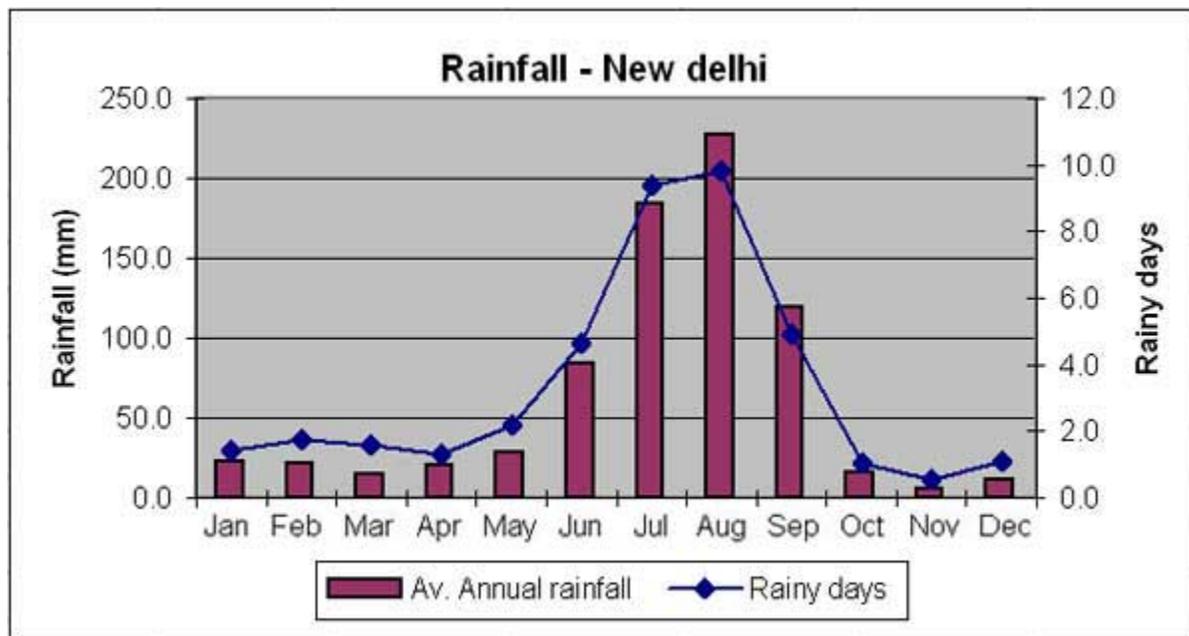

*Weather Graph for Delhi*

Note: These are average maximum and average minimum temperature for Delhi. The highest temperature in Delhi for the month is usually higher than the average maximum temperature. Similarly, the lowest temperature in Delhi for the month is usually lower than the average minimum temperature.

## 25 Years Average (1981-2005) rainfall data

Months	Av. Annual Rainfall (mm)	Rainy Days
Jan	22.5	1.4
Feb	22.0	1.8
Mar	14.5	1.6
Apr	20.6	1.3

Nov	5.6	0.6
Dec	10.9	1.1
<b>Total</b>	<b>755.4</b>	<b>39.7</b>

## **Ground Water Scenario**

The dependence on ground water is quite considerable in the area. The Ground water availability in the territory is controlled by the hydrogeological situation characterized by occurrence of alluvial formation and hard rocks such as quartzite. The hydrogeological set up and the following distinct physiographic units further influence the ground water occurrence: (1) Older Alluvial Plain on the eastern and western side of the ridge. (2) Yamuna Flood Plain deposits. (3) Isolated and nearly closed Chattarpur alluvial basin. (4) NNE-SSW trending Quartzite Ridge. The yield of tube wells ranges between 18-144 m<sup>3</sup>/ hr in Yamuna Flood Plain aquifers. In Older Alluvium of eastern and western sides of the ridge, the yield of tube wells ranges between 12 to 36 m<sup>3</sup>/ hr. Tube wells constructed in Chattarpur alluvial basin tapping the aquifers of both alluvium and weathered and fractured quartzite yield about 9 to 27 m<sup>3</sup> / hr. Discharge of tube wells constructed in Quartzites varies from 6-15 m<sup>3</sup> / hr.

The groundwater is declining in majority of the areas of Delhi on account of overexploitation of the resources. The rate of decline is as high as 1.7 to 2 meters/year in some areas (South & South west Dist.). Thus seven out of nine districts of Delhi are categorized as overexploited with respect to dynamic groundwater resources. The groundwater quality shows horizontal and vertical variation in space. The deeper aquifers are mostly underlain by saline water in alluvial areas. The extent of fluoride contamination in groundwater is also high in western part of Delhi in areas like Northwest, Southwest & West districts. The groundwater management aspects of Delhi emphasizes on augmentation of groundwater resources and improvement in groundwater quality through measures like rainwater harvesting and artificial

recharge, conservation of groundwater by limiting withdrawal in overexploited areas and limited development of potential aquifers of Delhi to augment drinking water supply.

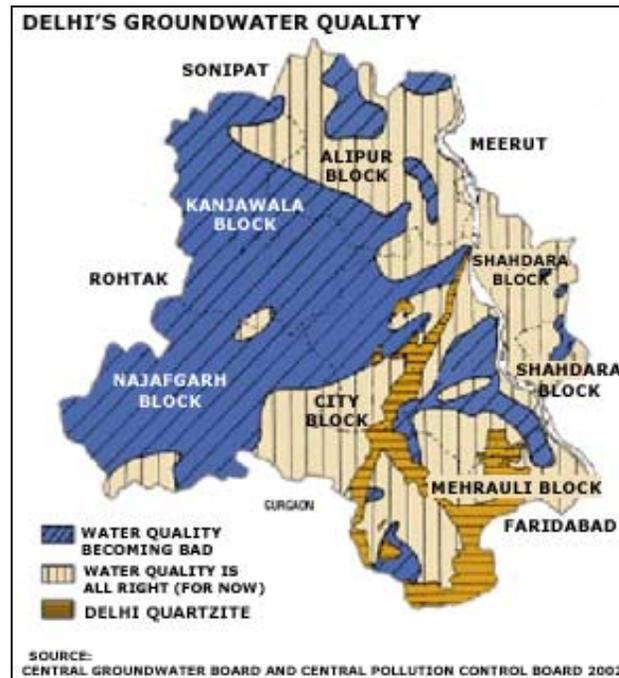

The quality of ground water is alkaline with pH ranging from 7.1 to 9.2, chloride content ranges between 21 and 1380 ppm. South of Delhi average chloride content is 250 ppm while in Najafgarh area it is around 1000 ppm rendering the water saline covering the area of 32 km. Sq. and marginally saline over the area of 129 sq km.

The ground water study done by the NEERI for MoEF revealed high nitrate and fluoride concentrations. High metallic content, particularly manganese and iron have also been observed in the samples collected. The manganese content was found to be 0.1 mg/L against the permissible limit of 0.5-mg/L and iron concentration of 4.05 mg/L to 0.337 mg/L have been observed.

#### **Chemical Quality of Ground Water in South West district**

Ground water in maximum part of the South district is fresh and potable with electrical conductivity ranging from 320 to 4130 micro-mhos/cm at 25` C. Electrical conductivity values more than the permissible limit are observed at Deragaon, Molarbund and at Gadaipur. High values of nitrate are found at four locations i.e. at Gadaipur, at Rajokri and at Jaunapur. In north Ghitorni and Andheri More, Fluoride is more than permissible limits. Except chromium concentrations at one locality, ground water is devoid of pollution by heavy metals. A comparison of ground water quality from 1983 to 2000 shows quality deterioration in the central part of the Chhattarpur basin and in the areas around Nizamuddin. In central part of the Chattarpur basin, quality deterioration is mainly because of over-development of ground water resources. The exhaustion of fresh water present at shallow depths is resulting into brackish water pumping from the tubewells that are tapping the deeper aquifers of alluvium.

The electrical conductivity of shallow ground water in the Southwest district varies from 630 to 13200 micro-mhos/cm at 25` C. Detailed Electrical Conductivity map prepared for this district, ground water quality is fresh with electrical conductivity 1000 to 2000 micro-mhos/cm at 25` C. Thus, with over-development of ground water resources in the district, more and more areas are becoming brackish.

## 1.2 Background:

Najafgrah Drain Basin is figuring at Sl. No. 61 of the list of 88 clusters/areas. Along with Najafgarh Drain Basin, four more industrial areas of Delhi i.e Wazirpur, Naraina, Anand Parbat and Okhla have been added as critically polluted. The map of area is enclosed as *Annexure-I*.

The list of industrial areas whose waste waters are reaching Najafgarh Drain is given below. The number of industries who have applied for consent with DPCC in each area is given below

<b>NORTH ZONE</b>		
1.	G.T. Karnal Road Industrial Area	520
2.	Rajasthani Udyog Nagar Industrial Area	152
3.	S.M.A. Industrial Area	238
4.	S.S.I. Industrial Area	202
5.	Wazirpur Industrial Area	1914
6.	Lawrance Road Industrial Area	898
7.	Udyog Nagar Industrial Area	587
8.	D.S.I.D.C. - Sheds Nagloi	
9.	Mangol Puri Industrial Area (Both DDA & DSIDC)	1083
10.	Badli Industrial Area	650
11.	Narela Industrial Area	3139
12.	Bawana Industrial Area	1995
<b>SOUTH ZONE</b>		
1.	Okhla Industrial Area, Ph-I & Ph-II	2107
<b>WEST ZONE</b>		
1.	Naraina Industrial Area Ph-I & Ph-II	877
2.	Mayapuri Industrial Area Ph-I & Ph-II	1597
3.	Tilak Nagar Industrial Area	52
4.	Kirti Nagar Industrial Area	574
5.	D.F.L. Industrial Area, Moti Nagar	105
6.	Najafgarh Road Industrial Area	598

As per the Delhi Master Plan 2021, 20 new industrial areas have been earmarked for redevelopment considering various factors. Anand Parbat Indl area is one of these industrial areas. Other industrial areas falling in the catchment area of Najafgarh Drain are Samaipur Badli, Sultanpur Mazra, Hastal Pocket – A, Naresh Park Extension, Libaspur, Peeragarhi Village. Khyala, Hastal Pocket-D, Shalimar Village, Nawada, Rithala, Swaran Park Mundka, Haiderpur, Dabri and Basai Darapur. These areas have been approved as industrial areas for redevelopment by Ministry of Urban Development, UOI as per their policy as these areas consists of more than

70% industries. Though number of industries are in operation, they will be considered authorized/approved only when the areas are redeveloped and notified as industrial areas. The said task has been entrusted with DSIIDC, Govt. of NCT of Delhi. All the units in unauthorized and redevelopment areas shall be allowed to operate with the adequate pollution control systems.

### **1.3 SOURCES OF POLLUTION:**

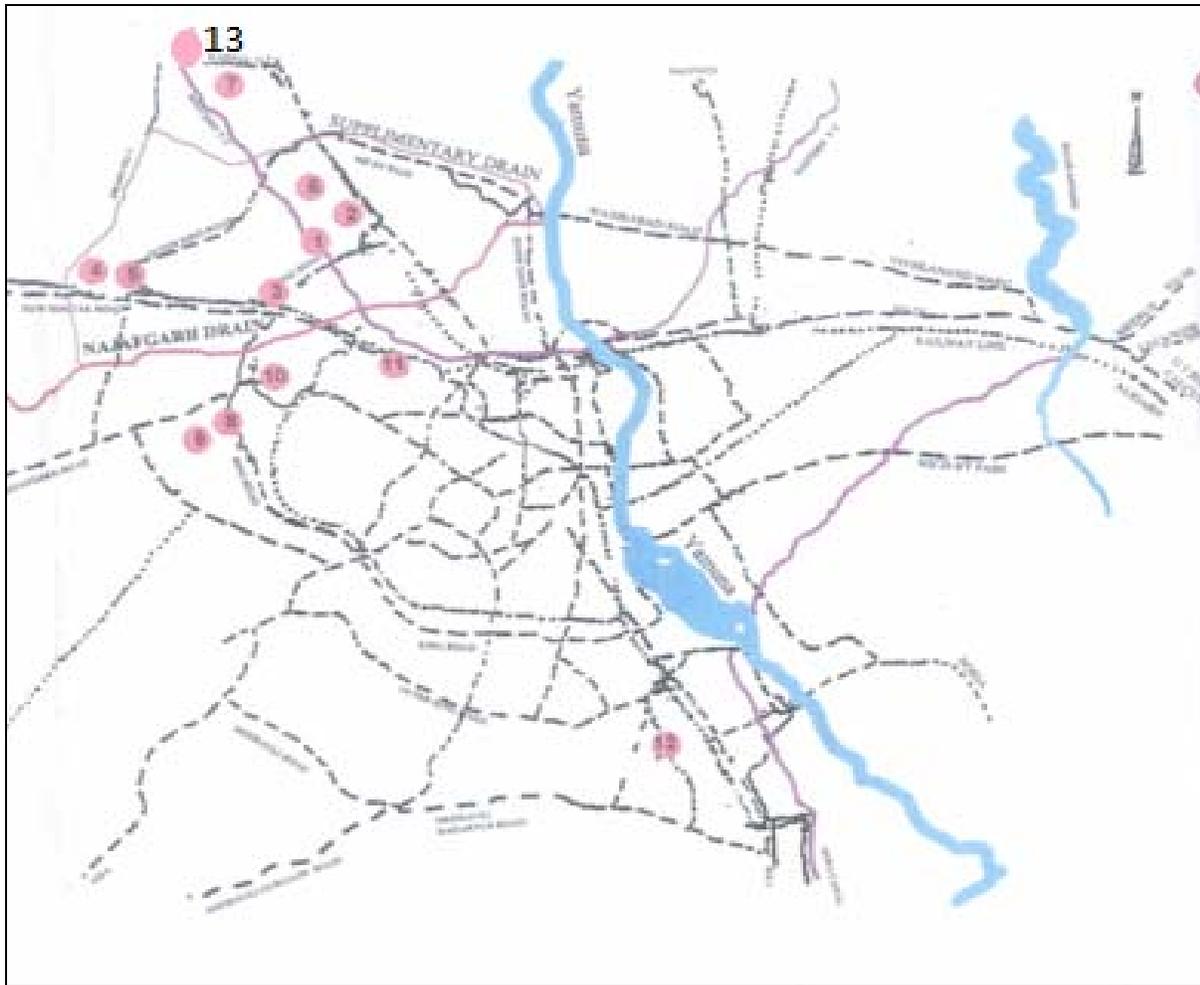

#### **1.3.1 Water Pollution:**

Water pollution is being caused by the industries engaged in the activities of pickling, dyeing, electroplating and other miscellaneous water polluting units. etc. in the industrial areas as well as non industrial areas falling in the catchment area of Najafgarh Drain. Pickling units use hydrochloric acid for cleaning the surface of the products. Significant amount of wastewater is generated by these units. The main pollutants in the wastewater discharged by the industry are pH & TDS. Same is the case with other water polluting units engaged in different activities. Most of the units are equipped with CETPs to treat the waste waters generated in these industrial areas but there is no provision for controlling the TDS.

Pursuant to the order of Hon'ble Supreme Court of India, 15 CETPs were proposed to cater to the needs of treatment of waste water generated by the 21 industrial areas of NCT of Delhi. However, only 10 CETPs, out of the above 15 proposed CETPs, have been constructed so far and are operational at present. One more CETP at Narela industrial area has been constructed by DSIIDC which is also operational. Waste water from all the CETPs except for Jhilmil & Friends Colony Indl Area is entering into Najafgarh Drain, which in turn meets the river Yamuna.

The list of these 10 CETPs along with their installed capacities and present utilization is given below:

Sl.No.	Name and location of the CETP	Indl areas being catered to	Installed capacity in MLD	Capacity being treated at present in MLD
1	GTK Road Indl Area CETP	GTK Road Indl Area	6	2 – 2.5
2	Lawrence Road CETP	Lawrence Road	12	2.5
3	Badli Industrial Estate CETP	Badli Industrial Estate	12	0.6
4	Mangolpuri CETP	Mangolpuri	2.6	1.2
5	Okhla CETP	Okhla	24	3.0
6	Wazirpur Indl Area CETP	Wazirpur Indl Area	24	1.45
7	DSI IDC Nangloi & Udyog Nagar Indl Area CETP	DSI IDC Nangloi & Udyog Nagar Indl Area	12	1.3
8	SMA Indl Area CETP	SMA Indl Area, SSI Indl Area and Rajasthan Udyog Nagar Indl Area	12	1.55
9	Mayapuri CETP	Mayapuri Indl Area	12	3.74
10	Narela Indl Area CETP	Narela Indl Area	22.5	8.0 – 9.0

Map showing CETPs of Najafgarh Drain Basin

LEGEND

Railway line .....  
 Road .....  
 Drain .....

- |               |                   |                  |                                |
|---------------|-------------------|------------------|--------------------------------|
| 1. Wazirpur   | 2. GT Karnal Road | 3. Lawrence Road | 4. Udyog Nagar & DSIDC Nangloi |
| 5. Mangolpuri | 6. SMA, SSI & RUN | 7. Badli         | 8. Narela                      |
| 9. Mayapuri   |                   |                  |                                |
| 10. Okhla     |                   |                  |                                |

Apart from the above, the construction of CETPs at industrial areas such as Anand Parbat, Okhla industrial estate and Mohan Co-operative industrial areas have been kept in abeyance by Environmental Pollution Control Authority (EPCA) headed by Sh. Bhure Lal. The construction at Najafgarh Road Indl area is presently not in progress due to dispute with the contractor of CETP and at Naraina Industrial Area is in the final stages of commissioning.

DPCC has been collecting samples of waste water at both inlet and outlet of the all the operational CETPs on monthly basis and appropriate action to rectify the deficiencies has been issued from time to time. The parameters which are not meeting the norms, at each of the CETP, during the period (June 2009 to May 2009) have been tabulated and the same is enclosed as *Annexure –II*. Perusal of the said table establishes that the parameters such as TDS, Chlorides, and Fluorides are not meeting the norms by most of the CETPs on certain occasions and BOD on some occasions by some of the CETPs. The deficiencies are informed to the respective CETP Society and they are directed to remove the same to comply with the norms laid down. The major issue of concern is that the quantity of waste water reaching the respective CETPs and being treated is very low compared to the total installed capacities. This is particularly because entire polluting industries has either been closed or shifted out of Delhi.

### **Domestic Pollution:**

About 840 MGD of water is required to cater to the needs of the population of NCT of Delhi. Due to consumption of such huge quantity of water by the population, about 672 MGD of waste water is generated. However, the total treatment capacity of STPs as on today is only 512.8 MGD, which is well below the required capacity, apart from having large number of localities of NCT of Delhi not covered by any sewerage network. Number of steps are being

taken by both DPCC and other statutory agencies such as Delhi Jal Board, Department of Industries etc to check the water pollution.

### **1.3.2 Air Pollution:**

The environment of NCT of Delhi has degraded a lot during the last few years due to rapid urbanization, industrialization, increase in population, vehicles and commercialization of land available within the town. The main stationary sources of air pollution are the industrial units, which are emitting particulate matter, sulphur di-oxide and oxides of nitrogen etc. But the rate at which the said degradation has occurred has reduced due to various steps taken by DPCC and other agencies to rein in the air pollution levels. Burning of rice and wheat straw by the farmers in the agricultural fields of NCT of Delhi is also affecting the ambient air quality of the town. As per report of Central Pollution Control Board, the Cumulative Environmental Pollution Index (CEPI) in respect of air has been calculated as 79.54 for Najafgarh Drain basin, on the basis of which the said basin has been declared as critically polluted area.

#### **Sources of Air Pollution:**

##### **(a) Mobile sources:**

With the development of industries, growth of population and rise in living standards, the demand of two wheelers and four wheelers has increased manifold. At present, there are about 60 lakh registered vehicles on the roads of Delhi, which one of the major contributors towards the deteriorating ambient air quality of the city. The dust lying on the roads reenters the atmosphere resulting in increased levels of Particulate Matter.

##### **(b) Stationary Point Sources:**

(i) Private or public sector organizations are carrying out major construction activity in the city are emitting significant quantity of dust emissions into atmosphere, which need to

take necessary steps to ensure that no dust emissions are emitted from their activities and the debris generated as a result of these activities are disposed off at a proper place instead of dumping the same in an haphazard manner.

- (ii) NCT of Delhi consists of agricultural fields and burning of rice/ wheat straw by the farmers in the fields is also affecting the ambient quality of the town.

### **Ambient Air Quality Monitoring Data of NCT of Delhi:**

In order to determine the status of quality of the ambient air in the catchment area of Najafgarh Drain basin, the Board is monitoring the ambient air quality of at various locations for the last number of years. The ambient air quality monitoring analysis of last 12 years (as given below) reveals that the annual average concentration of Respirable Suspended Particulate Matter (RSPM) is in the range of 160 to 301  $\mu\text{g}/\text{m}^3$  against annual average prescribed standard of 120  $\mu\text{g}/\text{m}^3$  for industrial area, 60  $\mu\text{g}/\text{m}^3$  for residential, rural & other area and 50  $\mu\text{g}/\text{m}^3$  for sensitive area. So, the concentration of RSPM in ambient air is more than the prescribed limit.

#### **Concentration (Annual Mean) of Different Pollutants in Delhi**

Parameter	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010*
SO <sub>2</sub>	18.7	20.4	19.5	18	14.1	11.3	9.5	9.3	8.8	10.2	4	5	5	5
NO <sub>2</sub>	44.9	42.2	40.1	41.8	41.8	50.8	55.8	57.4	55.9	55.9	38	43.1	47.3	51
SPM	363	378	375	431	382	456	391	390	373	433	365	416	492	550
RSPM				191	150	192	170	160	168	177	161	201	248	301

All values in micrograms/m<sup>3</sup>

Source: CPCB

\* averaged upto April 10

Comparison of the values observed in 2010 with values of 2002 shows reduction of 55.8 % in SO<sub>2</sub> Concentration and 9.24% in NO<sub>2</sub> concentration whereas Particulate Matter concentration shows an increase of 5 % and 29.7% in respectively in SPM and RSPM concentration

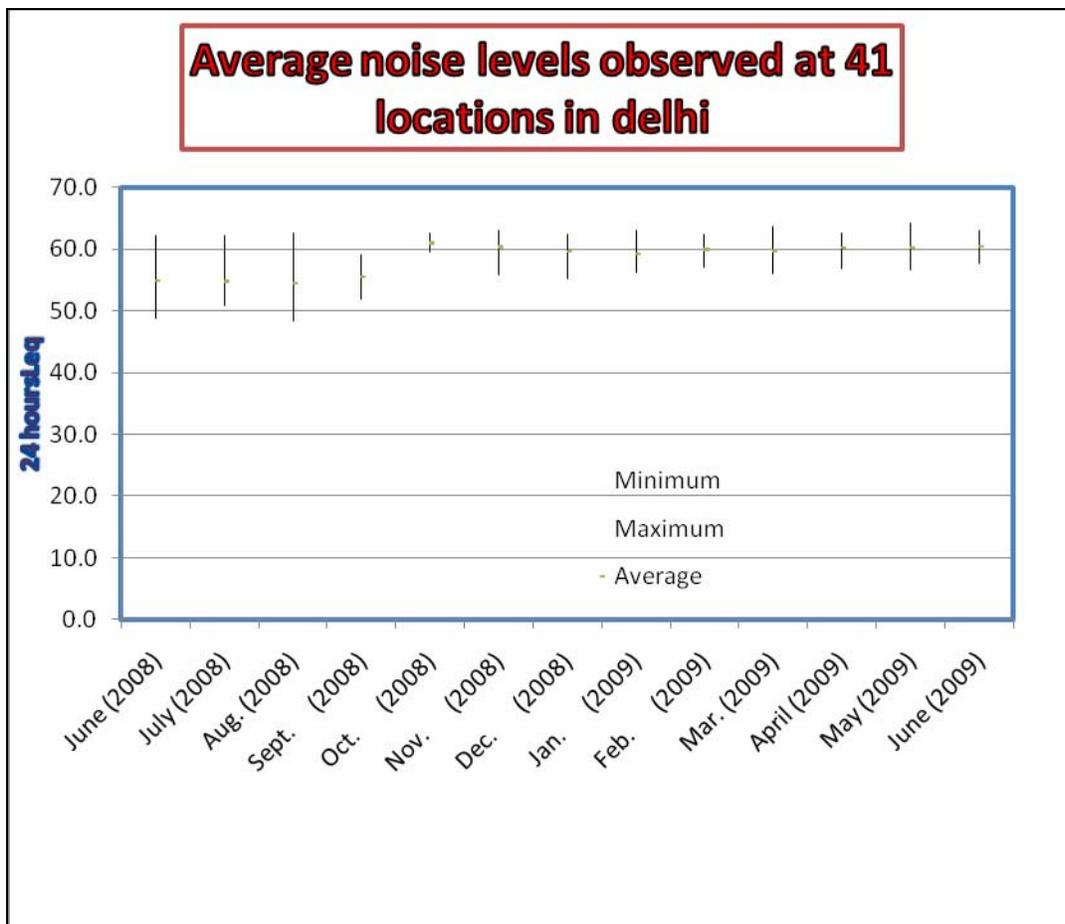

Parameter	Permissible limits Micrograms/Nm <sup>3</sup>	
	Old	New
RSPM	100	60
SO <sub>2</sub>	50	80
NO <sub>x</sub>	40	80

In addition to the industrial air pollution, the other factors contributing towards the ambient air quality deterioration are:

- i) Rapid increase in the vehicular density due to industrialization and commercialization.
- ii) Haphazard growth of the industries in both industrial as well as non industrial areas.
- iii) Lack of proper infrastructure such as roads, green belts, buffer zones etc.

#### **1.4 Noise Pollution:**

Noise pollution is one of the important aspects which has escaped attention of policy makers. However, the said noise pollution is one of the major dangers lurking round the corner. As per the noise monitoring carried out by the DPCC in year 2008 -09 on monthly basis is shown in table Noise levels exceeded in most of the locations. Therefore, there is a need to reduce the noise levels and to take precautionary measures in the areas where the noise levels are at the border line.

### 1.5 Hazardous Waste:

There are numerous units situated in the industrial areas located in the Najafgarh Drain basin and other four industrial areas that generating hazardous waste. The main hazardous waste is generated from arc / induction furnaces as dust from air pollution control device i.e. Category 34.1 of Schedule-I. Also, in steel rolling mills, air pollution control device dust is considered as hazardous waste, which is also covered under 34.1 category of Schedule-I of Hazardous Wastes (Management, Handling and Transboundary Movement) Rules, 2008. About 5281.80 Tonnes per annum of hazardous waste is generated by these industries in entire NCT of Delhi as per the inventorisation carried out by Ramky's.

## **1.6 Bio-medical Waste:**

In Delhi there are 3 Common Bio-Medical Waste Treatment Facilities (CBWTF)s (one in South district, two in North West district) & one more CBWTF (at Nilothi STP, in West district) has been granted Consent to Establish by DPCC on 20.04.10.

Besides these CBWTFs, many hospitals e.g Safderjung, RML, Lal Bahadur Shastri Hospital, Swami Dayanand, e.t.c are having their own incinerators / Bio Medical Waste Treatment Facilities.

All the incinerators for Bio medical Waste are having Venturi Scrubber as Air Pollution Control Device for the control of pollution within the prescribed norms.

As per the Annual Report for year 2009, Delhi generates about 10 tonnes ( 9858.795 Kg/day) of Bio Medical Waste (including all the Govt. Hospitals having their own treatment facilities) whereas installed capacities for treatment of Bio Medical Waste with the existing 3 CBWTFs is about 23 tonnes per day which is more than the requirement at present . Besides this Nilothi STP which has been granted Consent to Establish on 20.04.10, will be having treatment capacity of 10 tonnes per day this will enhance the total installed treatment capacity to 33 tonnes per day. As far as the management of this waste is concerned, NCT of Delhi has done tremendous progress.

Two manufacturers of B.P.Apparatus /Thermometers in Delhi have agreed to take / buy mercury waste ( from B.P.Apparatus /Thermometers ) from the Health Care Establishments ;

1. M/s Supreme Surgico, 262/ 425, Lane No.8, Friends Colony Industrial Area,Shahdara, Delhi.
2. M/s Anita Industries, 29, Bhagat Singh Market, New Delhi.

## 1.7 Municipal Solid Waste:

1.10 About 9000 T/day of municipal solid waste is generated by entire NCT of Delhi and by 2024 the quantity is expected to be around 19100 T/day. Door to door collection of waste has been started in most of the MCD zones which will facilitate in proper collection, transportation and disposal. Work has commenced in 61 Wards out of 63 Wards [21 wards out of 22 wards in Civil Line Zone, 35 wards out of 35 wards in Rohini Zone and 5 wards out of 5 wards in Dwarka Pappan Kalan and a part of Vasant Kunj area] .The Concessionaire has submitted proposal for setting up of compost plant, RDF Plant and Engineered Landfill facility at Narela –Bawana site to MOEF [Ministry of Environment & Forest] and has obtained Environmental Clearance and has submitted CTE application to DPCC in the month of Nov 2010. The work of collection of MSW from municipal receptacles & its transportation upto SLF sites has already been awarded to private concessionaires in South, Central, West, City, Karol Bagh and Sadar Paharganj Zone.

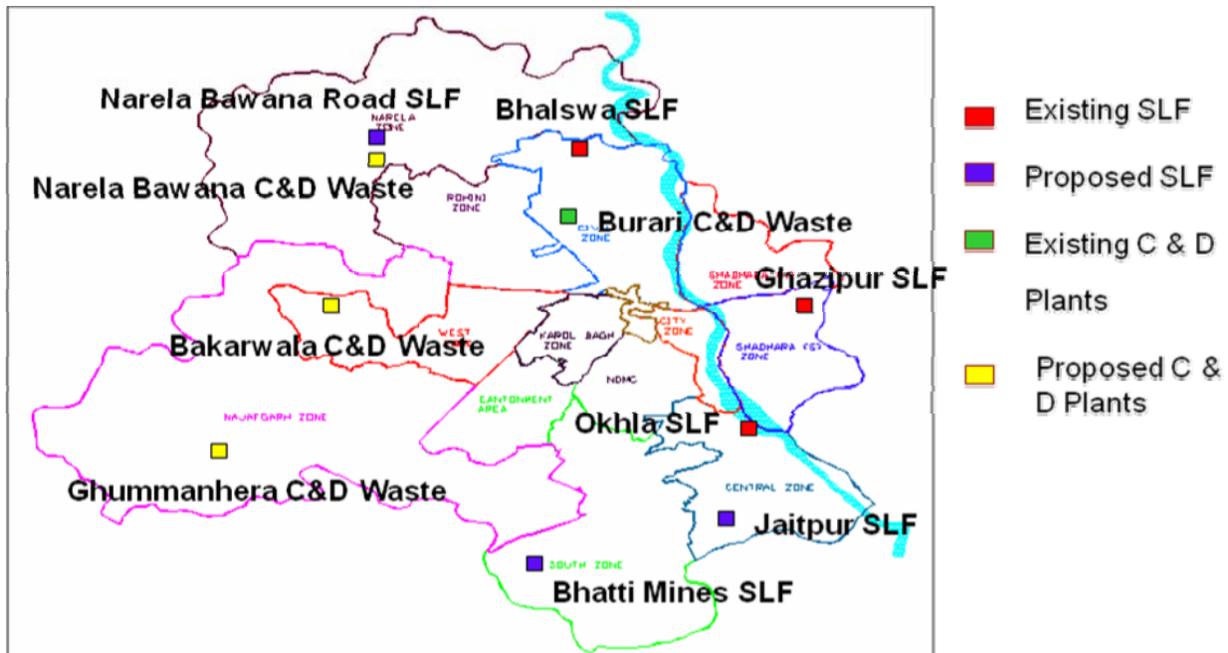

**Najafgarh, Narela Zone:** Currently being done by MCD. The department proposes to hire tipper trucks and loaders for collection & transportation of MSW from private parties.

### **Land Fill Site (s): Since 1975**

- Set up so far: 20
- Already Filled up and Closed: 15
- Suspended: 2
- Active Landfill [Dump] sites 3

## Existing Landfill Sites

Land Fill Site	Location	Area (Hectare)	Start Year	Waste Received (T.P.D.)/Waste already dumped/ Remaining life	Zone Supply
Bhalswa	North Delhi	21.06	1993	2200 2.77 Million T Nearly full	Civil Line, K.B., Rohini, West and Najafgarh
Gazipur	East Delhi	29.16	1984	2000 4.74 Million T Nearly Full	Shah (N), Shah (S), City, S.P. & N.D.M.C.
Okhla	South Delhi	16.20	1994	1200 2.83 Million T Nearly Full	Central, Najafgarh, South and Cantonment

## **1.8 E-Waste:**

The e-waste is generally generated from dismantling activities of various electrical / electronic appliances / gadgets such as audiovisual components, televisions, VCRs, stereo equipment, mobile phones and computer components. But till date, no inventory of such waste has been prepared. However, for the proper disposal of such type of waste, the Ministry of Environment & Forest has included this waste in the Hazardous Wastes (Management, Handling & Transboundary Movement) Rules, 2008.

Numbers of initiatives have been taken by the Delhi Govt. towards the implementation of E Waste guidelines and Rules such as placing of E waste collection bins at various locations in Delhi and E-Waste authorized Recyclers to ensure that the collected E-Waste is recycled in a safe manner. All Delhi Computer Traders Association (ADCTA), Nehru Place, Delhi, was directed to advise their members to send their E-Waste only to the registered recyclers with CPCB. Letters were also sent to different Govt. Departments, IT Companies & Hospitals in Delhi advising to dispose their E-Waste & auction through registered recyclers only.

Some of the registered recyclers are given below:

**M/s Earth Sense Recycle Pvt. Ltd.**

Plot no. 225, Sector-VI,  
IMT Manesar, Gurgaon,  
Haryana-122 051.

**M/s Attero Recycling Pvt. Ltd.**

173, Village Bhagwanpur,  
Raipur Industrial Area, Roorkee Distt.,  
Haridwar, Uttarkhand.

**M/s TIC Group India Pvt. Ltd.**

J-2 & J-6, SDF Block-J, Noida  
Special Economic Zone (NSEZ)  
Noida Dadri Road, Noida-201305

## **2.0 Initiatives/Actions taken by DPCC and other agencies**

Najafgarh Drain Basin was also figuring in the already identified 24 Critically Polluted areas. After the identification prior to 2000, a number of steps have been taken by DPCC as well as by various other agencies to bring down the pollution levels.

- Closure of 1328 'H' category units in year 1996 resulted in closure of large scale and highly polluted units like Shriram Foods and Fertilizers, Hindustan Insecticides Limited, DCM Silk Mills, Birla textile Mills, Swatantra Bharat Mills, Indian Oxygen Limited, Hindustan Vegetable Oils and other Hazardous and Obnoxious industries like Leather Tanneries, Hot Mix Plants, Lead Smelting units, Pesticides, Heavy foundries, Heavy Steel Rolling Mills etc.
- In year 2000-2001 intensive drives have been undertaken by Govt. of Delhi to close down the Polluting industries operating in residential areas of Delhi falling under F-27/33 category of units identified by Nodal Agency (Ministry of Urban Development, UOI) and Group of Experts, constituted by GNCTD. In total 3423 units have been closed down by the Govt of NCT of Delhi. By the continuous efforts of DPCC, about 1191 units were directed to be closed down by SDMs operating in non-conforming/residential areas. Compliance reports for closure have also been received from SDMs in case of most of these 1191 units.
- Steps taken for the mitigation of water pollution by way of commissioning of CETPs, STPs and installation of ETPs in water polluting units, industrial areas and malls.
- Extraction of ground water in some of the districts banned to save natural resources and a notification was brought out in the year 2010 empowering DJB and DC to sanction necessary permission to any person/authority to extract ground water.
- By the continuous efforts of DPCC, about 861 units have installed individual Effluent Treatment Plants to treat their waste water before discharging into the conveyance system

leading to respective CETPs. List of these 861 units who have installed ETPs is enclosed as ***Annexure-III.***

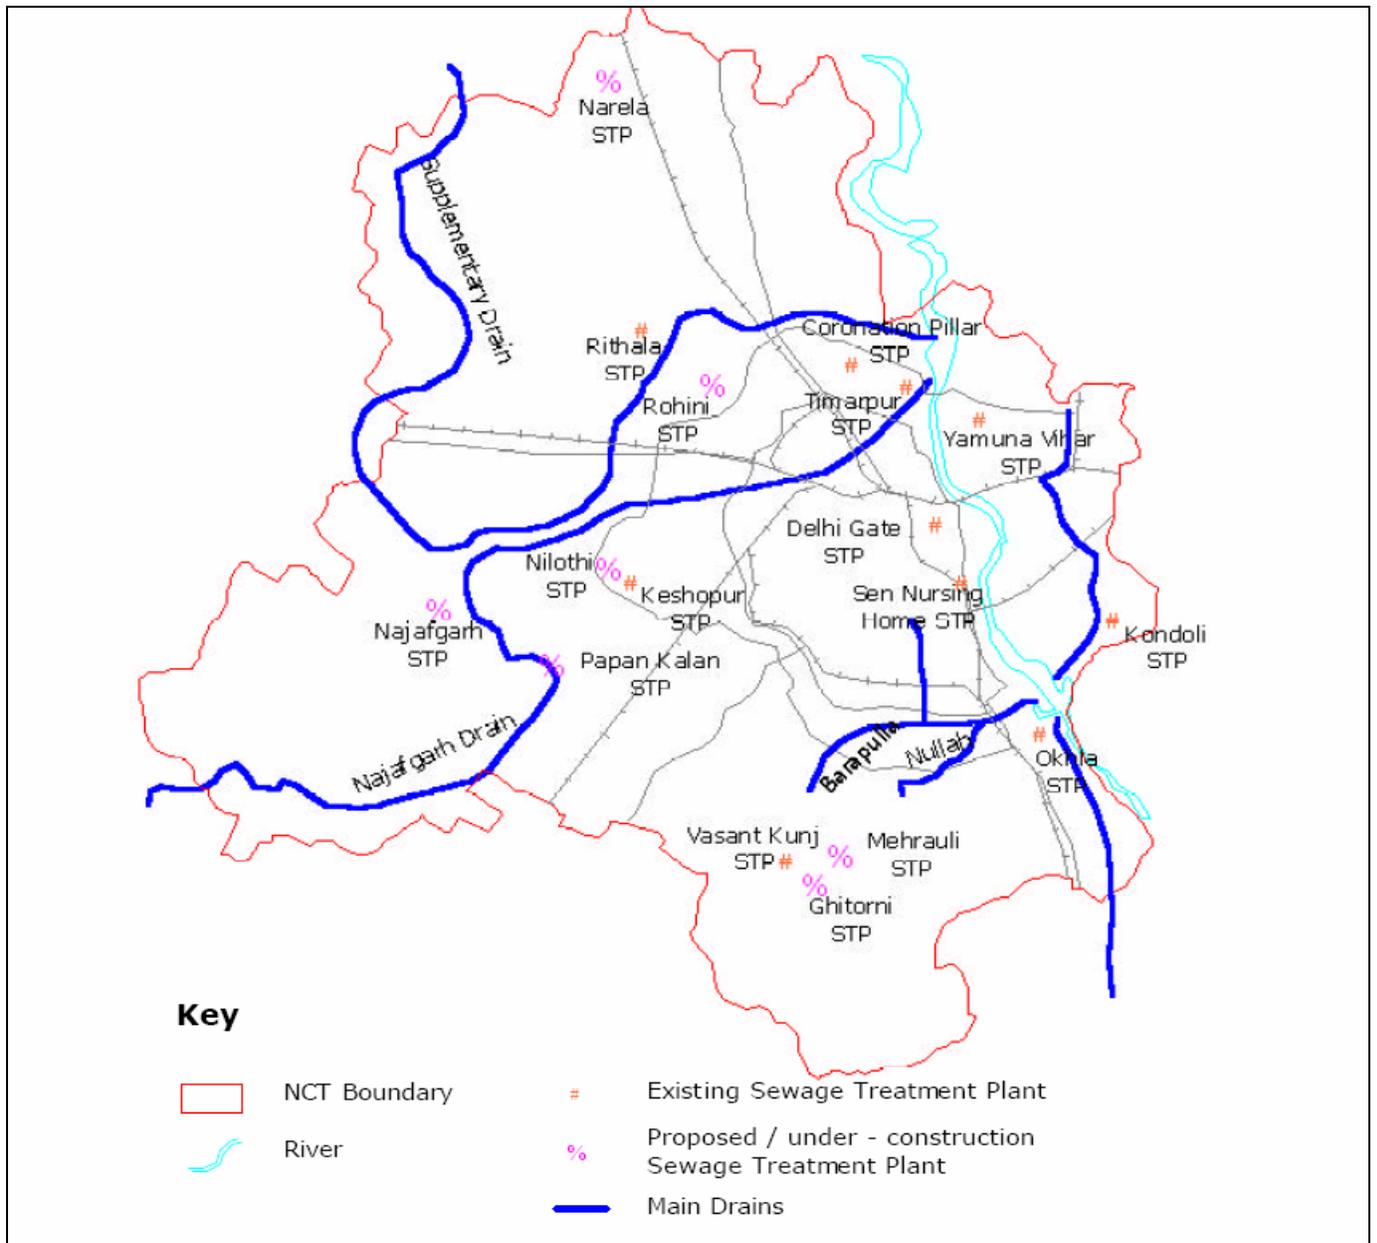

As far as the generation and treatment of domestic waste water is concerned, DJB has till now installed Sewage Treatment Plants at 16 locations with an installed capacity of 512.8 MGD. This capacity is proposed by DJB to be augmented to 730 MGD by the year 2021.

Status of generation and installed capacities of various STPs is given as below:

- Total water supply by DJB – 850 MGD
- Expected effluent generation – 680 MGD (80% total water supply)
- Percentage of effluent treated by STPs – about 50%.
- Total capacity of STPs – 512 MGD.
- Actual treatment through STPs – 350 MGD
- Percentage utilization capacity of STPs is only about 70 %.( this does not include total water quantity extracted from ground water).

**List of STPs operational in the catchment area of Najafgarh Drain**

<b>S.No.</b>	<b>Location of STP</b>	<b>Installed Capacity of STP (MGD)</b>
1	Nehru Vihar, Oxidation Pond STP	13.5
2	Keshopur STP	60
3	Rithala STP	80
4	Pappankalan STP	20
5	Najafgarh STP	5
6	Nilothi STP	40
7	Rohini STP	15
8	Coronation Pillar STP	40

### Location of STPs in Najafgarh Drain Basin

At present, major water polluting units operating in the industrial areas of Wazirpur, SMA, SSI, Rajasthan Udyog Nagar Indl Area and Badli industrial area and in other industrial areas falling in the catchment areas of Najafgarh Drain are engaged in the activities of Stainless Steel Pickling, electroplating, dyeing etc. The activity of S S Pickling has been placed in the

Negative list as per Delhi Master Plan 2021 and was supposed to be closed by 06.02.2010 but are still continuing because of one committee constituted by Ministry of Urban Development, Govt. of India is reexamining the issue. The list of 99 activities which have been placed under Negative/Prohibited category is annexed as *Annexure-IV*. However, the contribution of pollution load due to industries is only 4-5%. Industrial air pollution sources generally in these areas are boilers, furnaces, DG sets etc which have been addressed in the past and will also be tackled on priority to reduce the air pollution levels.

Najafgarh Jheel is located in the village of Najafgarh, starting from Dhandsa basin, which is very near to the border of Haryana state. Najafgarh Jheel is the initial point from where the Najafgarh drain originates. This lake is nearer to Gurgaon which falls in the state of Haryana. Most of the times, it was observed by the joint inspections of CPCB and DPCC that untreated waste water has been coming into the Jheel, which is polluting the jheel to some extent. The water quality found from the analysis of a sample collected on 30.3.2009 was found to be pH – 8.4, TSS – 176 mg/l, BOD – 56 mg/l and COD – 202mg/l. The quality of the water gets further deteriorated on the downstream stretches of the drain, as significant quantities of domestic waste water is flowing into the said drain.

This is due to the fact that the unauthorized residential colonies alongside the drain have not been laid with proper sewerage network leading to Sewage Treatment Plants and so the untreated waste water is contributing to very highly deteriorated water quality. The waste water flowing in this drain finally gets into river Yamuna.

Delhi Jal Board, after a detailed feasibility study by EIL, has proposed interceptor sewers for both Najafgarh Drain and Supplementary Drain which are contributing majorly towards the water pollution in the river Yamuna. The objective of the interceptor sewer project is to intercept

and convey for treatment, the flow of untreated waste water into the river via the three major drains. However, here we are keen on only two drains as specified above. The intention is to prevent untreated waste water from reaching the river, hence abating pollution. Implementing the planned interceptions as part of the project will achieve a reduction of BOD from 38.9 mg/l to 12 mg/l at the outfall of Najafgarh and Supplementary drains, as worked out through water quantity modeling. To bring the river water up to class C, treated effluent discharges need to achieve a treated BOD of 10 mg/l and sufficient dilution is to be ensured by neighboring states by releasing additional water in river Yamuna. Once the said project is completed, the waste waters entering into these drains are intercepted and will be treated before its discharge into the river Yamuna. The system includes provision of interceptor sewers along with associated works like interceptor pits, new sewage pumping stations, rising mains etc. along the drains involving the related Sewage Treatment Plants in the catchment areas. The project is an integrated approach towards zero sewage flows in the drains and the river. The cost of the project is about 1350 crores and is being implemented by Delhi Jal Board.

The quality of waste water flowing in the drain is monitored on monthly basis and the monitoring dated 02.6.2010 reveals that the quality was pH – 7.4, TSS – 136 mg/l, COD – 208 mg/l and BOD - 46 mg/l. The quality of the waste water flowing in the Najafgarh drain observed during several months is tabulated and given below:

<b>Month</b>	<b>pH</b>	<b>TSS mg/l</b>	<b>BOD mg/l</b>	<b>COD mg/l</b>
Feb 2010	7.7	120	42	180
Mar 2010	7.5	170	64	272
Apr 2010	7.7	120	50	240
May 2010	7.5	264	66	193
Jun 2010	7.4	136	46	208
Jul 2010	7.5	176	60	248

From the above table it is clear that quality of the waste water is not good to maintain the quality in the river for designated use.

For industrial water pollution control, intensive drives were taken up in year 2000 in view of Hon'ble Supreme court orders in IA No 725/94 of Maily Yamuna case due to which industrial units are well sensitized for installation of ETPs.

**Steps taken to control air pollution:**

Numbers of steps have been taken by DPCC as well as by various other agencies to bring down the air pollution levels to a greater extent.

- Installation of ECS by air polluting units. List of 353 units which have installed ECS is enclosed as *Annexure-V*.
- Closure of coal fired boilers in all industries and conversion to oil or gas based fired.
- Introduction of CNG as automotive fuel.
- Introduction of stringent Indian petrol and diesel specifications required to meet Euro-IV equivalent tail pipe emission norms since April 2010.
- Widening of roads, construction of large number of flyovers and under passes in Delhi to reduce traffic congestion thereby reducing vehicular pollution etc have been taken.
- Implementation of ECBC Code for building activities.
- Installation of STPs/ETPs in hotels and restaurants besides forcing them to reuse the treated waste water.
- Insisting all the construction agencies to have proper dust emission control systems during construction.
- Coal based thermal power plant namely IP Power Station was closed and the power plants which are coming up are all gas based ones thereby reducing air pollution. Even the other

operational coal based power plants are being pursued to switch over to cleaner fuel to meet stringent emission level of 50 mg/Nm<sup>3</sup>.

- BTPS has now proposed to go for 3x350 MW gas based units for which public hearing, as per the provisions of EIA notification dated 14.9.2006, has been carried out on 25.02.2011.
- Introduction of Metro rail.

Introduction of Metro Rail in Delhi has resulted in reduction of about 58000 vehicles per day on the roads, which in turn has saved fuel costs to the tune of Rs. 115 crores. Metro Rail has resulted in the following:

- Reduction in the member of vehicles and vehicle kms. on the roads with corresponding reduction in fuel consumption and vehicular emission
- Less congestion on the roads with proportionate increase in speed of road vehicles, resulting in further reduction in fuel consumption and vehicular emission
- Metro rail projects are thus not only environment friendly by themselves but also assist in reducing environmental pollution caused by other road-based modes of urban transport.

During the year 2009, following is the reduction in air pollutants into the atmosphere of Delhi.

Sl.No.	Parameter	Reduction in Tonnes
1	CO	2,418.70
2	HC	1157.50
3	NOx	481.27
4	PM	73.39
5	SO2	5.16
6	CO2	1,03,300
Total		107436.02

Data provided by DMRC

In Delhi, almost all the industries are of small scale and the statistics have always shown that the vehicular sector is responsible for 70% air pollution in Delhi as it contributes significantly towards ambient air pollution. It is a very well known fact that Delhi is getting accumulated with about 800 vehicles per day and there are about 60 lakh registered vehicles in Delhi apart from vehicles plying from other states. Though the increase in the number of vehicles is rapid, the percentage of increase in air pollution levels has been kept under check by taking above cited steps. All commercial vehicles have been converted to less polluting CNG mode and by improving the automotive fuel quality air pollution levels have been kept under check. Further increase in the network of the Metro rail will result in significant reduction in air pollution levels of Delhi.

One of the major contributors towards air pollution in NCT of Delhi is rapidly increasing building activity, which is being taken very seriously and the agencies are being asked to take all the necessary steps to control dust emissions from the excavation stage itself. The same is being specified while issuing Environmental Clearance and Consent to Establish and the same is monitored through periodic inspections.

For industrial pollution control the matter remains is only to operate the existing ETPs/ECS/CETPs regularly and to keep a vigil to stop new illegal units.

The profile of the industries which are in operation has changed drastically since 1997. Number of control measures have been taken reduce air as well as water pollution which has brought down the levels of these pollution to a significant extent. MCD is taking various steps to manage Municipal Solid Waste and is expected to collect, transport, treat and dispose off the entire waste in very near future. Regarding management of HW is concerned, due to no availability of adequate land and opposition from local people, the Government was not able to

construct TSDF for hazardous waste disposal in Delhi. However, it has been proposed to have the facility at Khanjawla and a land of 50 acres has been acquired and an amount of Rs. 35 crores has already been paid to DSIIDC. Once all the clearances such as getting EC is over, about one year time is required to complete the project and the same will be made operational.

In view of the steps taken/being taken by DPCC and various other agencies, CPCB is requested to drop the Najafgarh Drain basin including 4 other industrial areas from the list 88 of critically polluted areas. However, DPCC will strive very hard to ensure pollution levels of various nature are controlled and kept below the levels intended for.

However, DPCC will take action as per the details given below:

## **1.0 Water Pollution Control:**

**1.1 Treatment of effluents, by the individual units, Individual connection to conveyance system, before discharging into conveyance system leading to CETP:** Due to continuous efforts of DPCC, about 1305 units, in entire NCT of Delhi, have installed individual Effluent Treatment Plants to treat their waste water before discharging into the conveyance system leading to respective CETPs. In all, 10 CETPs, catering to the needs of 13 industrial areas falling in the catchment area of the drain are operational to treat the industrial effluents. CETP at Naraina Industrial area is yet to be commissioned. CETP at Anand Parbat has been kept in abeyance by EPCA. Pretreatment of waste water is done by the individual units in case of the industrial area wherever the CETP is installed and full treatment is required to be done by the units in the absence of any CETP. Continuous action is required to ensure all the units pretreat their effluents before discharging into the conveyance system to achieve the waste water quality at the inlet of the CETP as envisaged in the EP Rules, 1989.

Also it is to be ensured that all the individual units get connected to the conveyance system. Specific instructions are required to be issued to DJB to ensure the connections to conveyance systems as specific permissions are given by DJB for this purpose.

In NCT of Delhi most of the units, looking at the economics, have been using lime as neutralizing chemical to increase the pH which is increasing the sludge generation immensely. This sludge is generally Hazardous Waste as per the provisions of HWM Rules, 2008 amended to date. Collection, storage, transportation, treatment and disposal of the HW is becoming tedious and unviable economically. So as to reduce the HW generation, concerned units are required to be compelled to use NaOH in place of lime. This is the case with the CETPs, which are to be educated to use NaOH in place of lime to reduce HW generation. Sincere efforts are required by all the industries and CETPs to switch over to NaOH from lime to achieve significant reduction in HW generation.

**Action by: DPCC/Individual Inds/CETP Societies/Dept. of Inds/DJB**

**1.2. Reuse of treated water from various CETPs:** 10 CETPs with the installed 139.1 MLD are operational with enormous costs for installation and operation. After spending significant amounts for treatment, the treated waste water is again joining the adjoining drains and getting polluted again. By doing so, the money spent is getting wasted without any tangible usage, which is against the prudence. It is necessary to reuse this treated waste water for useful purpose, by further treating if required. This will become necessity in future looking at the very scarce water resources.

**Action by: CETP Societies/DJB/MCD/DDA/DFS/DPCC**

**1.3. Closure of units engaged in the activities listed in negative list / prohibited list as per MPD 2021:** As per the provisions of Delhi Master Plan 2021, certain activities have been placed in the negative list, which are not permitted to operate after 07.02.2010. Highly polluting units are

falling in the above said list and are required to be closed down. By closing these units water pollution can be reduced to very significant extent. Industries department and DDA are required to close down the units engaged in the activities listed in negative/prohibited list of MPD 2021.

**Action by: Delhi Govt./DDA**

**1.4. Construction of Interceptor Sewer on Najafgarh Drain and Supplementary Drain:** Water pollution, in these drains, is majorly caused due to discharge of untreated domestic sewage especially during the dry season. Delhi Jal Board has recently, after a detailed feasibility study by EIL, has proposed interceptor sewers for both Najafgarh Drain and Supplementary Drain which are contributing majorly towards the water pollution in the river Yamuna. Once the said project is completed the waste waters entering into these drains are intercepted and then treated before discharging the same into the river Yamuna. The system includes provision of interceptor sewers along with associated works like interceptor pits, new sewage pumping stations, rising mains etc. along the drains involving the related Sewage Treatment Plants in the catchment areas. The project is an integrated approach towards zero sewage flows in the drains and the river. Budget has also been sanctioned by the Delhi Government and Ministry of Urban Development, GOI for accomplishing the said project. Regular interactions with Delhi Jal Board are required to ensure the project is completed as per the time schedule.

**Action by: DJB/DPCC**

## **2.0. Air Pollution Control:**

### **2.1. Conversion of coal/ oil based boilers to gas based mode and ensuring strict usage**

**of approved fuels:** Coal/oil based boilers in Delhi are one of the air pollution sources which are to be addressed in a time bound manner and on priority. DPCC has decided not to permit the coal fired boiler and the units are being forced to convert their boiler on alternate fuel like oil/gas.

Converting into gas based mode is required to reduce the air pollution caused due to the former fuels. Continuous public campaigns such as issuance of Public Notices and subsequent inspections will discourage the units to use coal/oil and other unapproved fuels.

**Action by: Industries/IGL/DPCC**

**2.2. Ensuring operation of DG sets only with acoustic enclosure(s):** There are number of DG sets in operation in the four industrial areas and significant number of these DG sets is provided with acoustic enclosures which are causing noise pollution. As per the notification of MoEF, GOI, all the DG sets are required to be provided with acoustic enclosure to reduce noise pollution and all the new DG sets are to be provided with the noise control system by the manufacturer itself. Old DG sets are required to be phased out or provided with sound reducing systems. NDPL/BSES is to ensure sufficient/required power supply in these industrial areas.

**Action by: NDPL/BSES/DPCC**

**2.3. Thrust on Gas based power plants:** Looking at the pollution threat posed by coal based power plants in any urban area, coal based plants are being discouraged and only gas based power plants are being given go ahead to boost up the power generation. Two power plants by Pragathi Power Corporation Limited (PPCL) at Bawana (1600 MW) and at Bamnauli (750 MW) and one by NDPL at Rohini (108 MW) have been proposed power generation and it is worth to see that all the plants will operate on gas. The combined power generation of all the three plants will be to the tune of 2458 MW. NDPL will start its generation by October 2010 and other plants will be made operational by 2013. Out of these three, one plant of 750 MW capacity at Bamnauli is awaiting EC from MoEF, GOI.

**Action by: DPCC/Dept. of Power/MoEF, GOI**

### **3.0 Land and Soil Pollution:**

**3.1 Construction of TSDF for disposal of Hazardous Waste and Identification of illegal HW dump sites in the industrial areas & remediation of identified illegal HW dump sites:** Due to no availability of adequate land and opposition from local people, the Government is not able to initiate proceedings to construct TSDF for hazardous waste disposal in Delhi, which is allowing people to dump their HW in an open land indiscriminately thereby causing ground water pollution by way of leachate percolation into the ground water resources. It has been proposed to have the facility at Khanjawla and it has been decided to acquire land of 50 acres and the process of acquisition is underway. Once all the clearances such as getting EC is over, about one year time is required to complete the project and the same will be made operational. TSDF site is to be commissioned for HW treatment and its disposal in a time bound manner by pursuing with all the concerned stakeholders.

As per report of Ramky Infra Consulting Pvt Ltd report of August 2007, 12 illegal HW dump sites have been found in the industrial areas falling in the catchment area of the Drain and there is a possibility of more illegal HW dump sites. Already identified sites are required to be remediated on priority to avoid ground water contamination. This task is to be carried out by the land owning agency by engaging any expert external agency/consultant. Further inspections are to be carried out done to identify any new sites for immediate action.

**Action by: MCD/DDA/DSIIDC/Revenue Dept. /Dept of Environment**

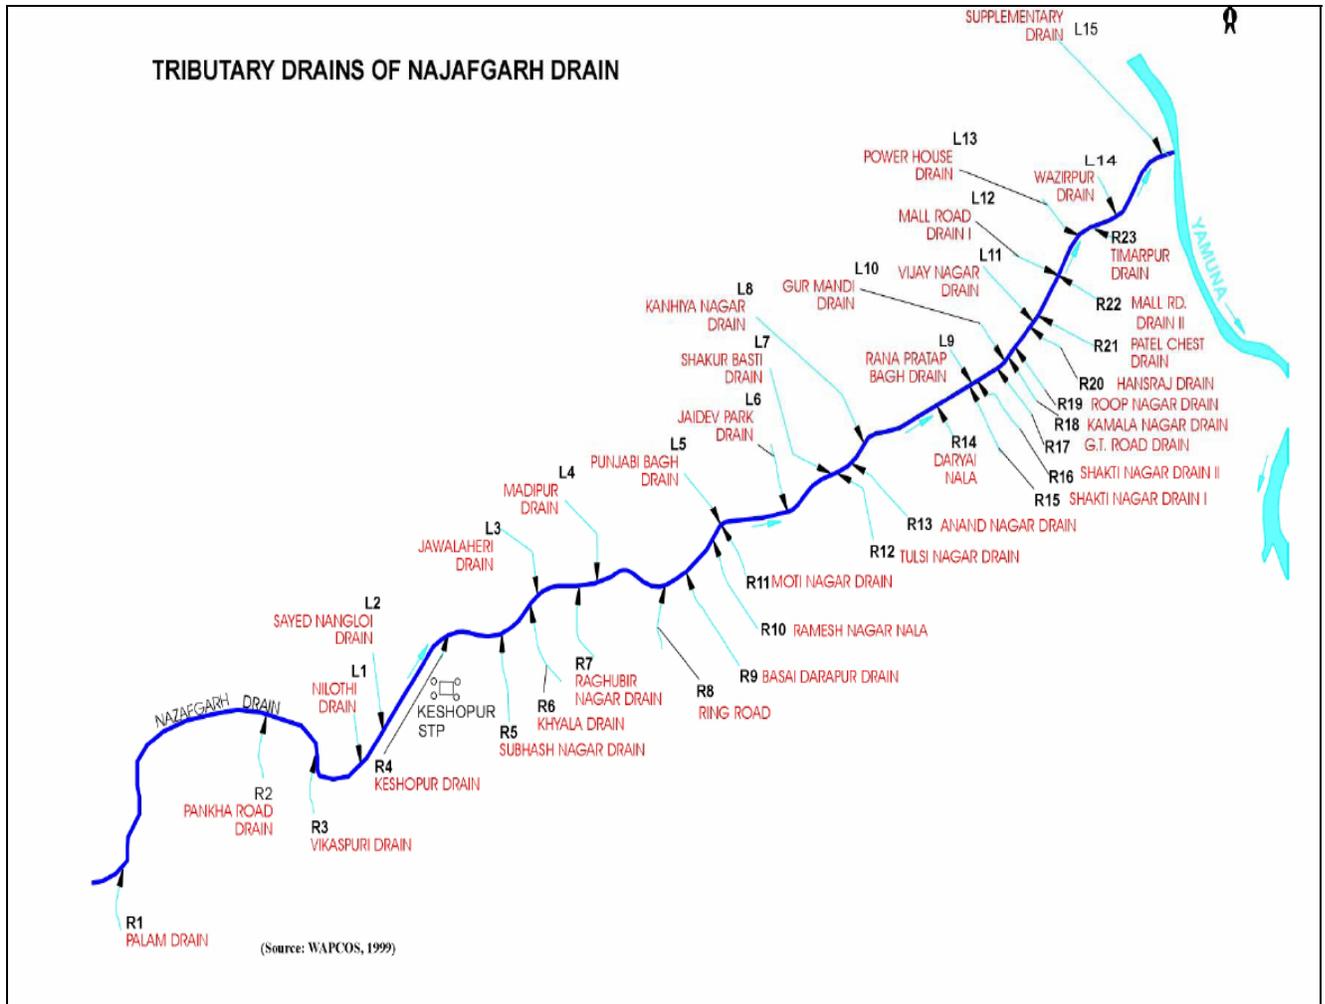

**3.1 Integrated MSW Management Facility at Narela:** Management of Municipal Solid Waste in Delhi is one of the important tasks which require immediate attention. The municipal authorities are doing their best to address this problem. Recently, MCD in partnership with Ramky

**Action by: MCD/DPCC/Ramky Infrastructure Ltd.**

**Summary:**

Looking at the submissions and facts of the development took place in the preceding years and also the proposed construction of interceptor sewer on major drains and other developments such as expansion of metro rail, widening of roads, BRT Corridors etc there is a clear evidence, from the environmental data given in page No. 16 of this report, that the scenario compared to the year 1997 has changed tremendously which requires removal of the area/cluster from the list of critically polluted areas. Steps proposed and other continuing actions will surely bring down the pollution levels in various spheres in NCT of Delhi and the CEPI of Najafgarh Drain Basin including other four industrial areas of Delhi will get reduced in a significant way.

In view of the above, MoEF, GOI and CPCB are requested to look into the matter and remove the said area/cluster from the list of 88 critically polluted areas.

**PROHIBITED / NEGATIVE LIST OF INDUSTRIES**

1. Arc/induction furnace
2. Acids
3. Alkalis
4. Animal & fish oils
5. Aldehydes
6. Acid slurry
7. Acetylides, phridines, iodoform, chloroform, E-nepthol, etc.
8. Ammonium sulphoajanide, arsenic and its compounds, barium carbonate, barium cyanide, barium ethyle sulphate, barium acetate cinnabar, copper sulphocyanide, ferrocyanide, hydro cyanide, hydro cyanic acid, potassium biocalate, potassium cyanide, prussiate of potash, phynigallc acid, silver cyanide
9. Aircraft building.
10. Abattoirs, animal blood processing.(except existing and relocation)
11. Bitumen blowing (hot)
12. Brick kiln (using fresh earth as raw material, coal as fuel)
13. B-nepthol
14. Bakelite powder (starting from formaldehyde)
15. Barely malt and extract
16. Bone-grist, bone-meal, salting of bones, storages of bones in open, bone drying
17. Bone charcoal manufacturing
18. Blast furnaces - coal fired
19. Bicycles (integrated plant)
20. Brewery and potable spirits
21. Chlorinated paraffin wax purification
22. Carbon black
23. Cement industry
24. Calcium carbide, phosphorous, aluminum dust paste and powder, copper, zinc, etc. (Electrothermal industries)
25. Cranes, hoists and lifts (excluding assembly)
26. General industrial machinery (such as hydraulic equipments, drilling equipments, boilers, etc.)
27. DOP (Dioctyl Phthalate), DBP & Plasticizer
28. Dry cell battery
29. Dye & dye intermediates
30. Distillation of wood, chemical seasoning of wood (excluding natural seasoning)
31. Explosives, i.e., Fireworks, Gunpowder, Guncotton, etc.
32. Earth moving machinery/equipment (manufacturing of assembly)
33. Electric wires and cables (more than 100 workers, 2000 sqm plot)
34. Fatty acids
35. Fungicides & pesticides

36. Flexographic ink
37. Fuel oils, illuminating oils and other oils such as stchetic oil, shoal oil, lubricants
38. Foundries (except Pit Furnace)
39. Gas compressors
40. Graphite production
41. Glass furnace (more than 1 ton/day capacity)
42. Gases-carbon-disulphide, ultramarine blue, chlorine, hydrogen, sulphur dioxide, acetylene, etc. (other than LPG/CNG/Oxygen/medical gases)
43. Glandular/glandes extraction
44. Glue and gelatine from bones and flesh
45. Hot mix plant (except those approved by DPCC / CPCB)
46. Hazardous waste processing viz. hospital/medical/industrial waste
47. Polyurethene foam
48. Industrial gelatine, nitro glycerine and fulminate
49. Iron / steel metal forging (using pneumatic hammer).
50. Industrial gelatine, nitro glycerine and fulminate
51. Industrial trucks, trailers, etc.
52. Linear alkyd benzene
53. Lead manufacturing including secondary lead industry (recovery of lead from waste scrap)
54. Lime kiln.
55. Leather tanning and dyeing (raw hides/skins to semi finish)
56. Locomotives and wagons
57. Methanol
58. Methylated spirit
59. Mechanical stone crushers & washing of coarse sand
60. Manufacturing of pulp & paper
61. Melamine resin
62. Mineral salts (which involve use of acids: CuSO<sub>4</sub>, FESO<sub>4</sub>, alum, etc.)
63. Manufacturing of diesel engines, generators except assembly
64. Motor cycles, scooters, cars, tempos, trucks, etc.
65. News print manufacturing, pulping, fresh paper making
66. Nitrogeneors and phosphatic fertilizers, except mixing of fertilizers for compounding (large scale)
67. Organic solvent, chlorinated minerals, methanol, aldehydes, methylated spirits
68. Petroleum coke processing, not as fuel
69. Potteries/refractories (using coal or furnace oil)
70. Polyethylene polymers including resins
71. Paint industry (nitro Cellulose & Alkyd resin based)
72. Plasticisers manufacturing
73. Pyridines
74. Phenol formaldehyde resin and powder
75. Porcelain product potteries (using coal of production capacity more than 2 tonne per day)
76. Rubber solution and thinner (using naptha and rubber scrap)
77. Roasting of Ore Sulphide Oxides of mixtures
78. Rayon fibre manufacturing

79. Refractories
80. Reclamation of rubber.
81. Production of tyres and tubes (devulcanisation)
82. Saccharine
83. Secondary Zine industry
84. Synthetic rubber
85. Smelting
86. Sewing machines (integrated units) except assembly
87. Sluice gates and gears
88. Stainless Steel Pickling
89. Steam engines
90. Steel pipes and tubes (continuous welded/seamless)
91. Sugar, khand sari
92. Sodium silicate industry (more than 1 tonne/day)
93. Stone quarrying
94. Textile (more than 100 workers in all shifts, 1 acre of land, 100 LKD of water)
95. Thorium, radium and similar isotopes and recovery of rare earth
96. Turbines
97. Urea & Phenyl Formaldehyde resin
98. Vegetable oil hydrogenated
99. Waste (crude / burnt) oil processing (refinery)

**Notes :**

- (i) A public utility service involving any of the activities referred to above shall be permitted subject to environmental laws.
- (ii) Further additions / alterations to the list of Prohibited Industries could be made if considered appropriate and in public interest by the Central Government to do so.

## List of industries which have installed ETP

## Annexure-III

S.No.	Industry Name	Address	Activity
1	7 STAR BANQUET	20, SHIVAJI MARG INDUSTRIAL AREA NEAR MOTI NAGAR	BANQUET HALL
2	A.K. INDUSTRIES	A-102/1A, Wazirpur Indl. Area	Manufacturing of Pickling of S.S. Sheets.
3	A.S. INDUSTRIES	B-2417, DSIDC, NARELA INDUSTRIAL AREA	Anodizing power Coating & Buffing
4	A.T. INDUSTRIES	C-99, Phase-II, Mayapuri Industrial Area	Electroplating & Bakelite Moulding.
5	A.V. INDUSTRY	A-17, Ph-I, Okhla Industrial Area	Mfg. of needle rollers
6	A.V. METALS	A-75/2, Wazirpur Industrial Area	Pickling & Re-rolling of S.S. Sheet.
7	AAA VEHICLEADES PVT. LTD	B-244, Phase-I, Okhla Industrial Area	SERVICING REPAIRING AND WASHING OF FOUR WHEELERS VEHICLES
8	AAA VEHICLEADS LTD	9/95, KIRTI NAGAR INDUSTRIAL AREA	REPAIRING SERVICING AND WASHING OF FOUR WHEELERS
9	AASHNA ENTERPRISES	A-68, Wazirpur Industrial Area	Electroplating Industries
10	AB HEALTH PRODUCTS PVT. LTD.	B-119, Okhla Industrial Area, Phase-I	manufacturing of molding of soap chips into bars and cakes for bathing and medicinal use.
11	ABYSS PHARMA PVT. LTD.	B-121, Phase-I, Mayapuri Industrial Area	PHARMACEUTICAL FORMULATION
12	ADARSH STEELS	B-20, Group Industrial Area, Wazirpur	Pickling and cold re rolling of S. S. Sheets
13	ADARSH YAMAHA	F-26/4, Phase-II, Okhla Industrial Area	SALE AND SERVICING OF MOTOR BIKES UNIT.
14	ADVANCED TECHNOLOGIES	A-32, Phase I, Mayapuri Industrial Area	Phosphating and powder coating
15	AGANALL TRADERS PVT. LTD	B-100, Ph-I, Mayapuri Industrial Area	MARUTI AUTHORISE SERVICE STATION
16	AGARWALS	A- 282, DSIDC Industrials , Narela Industrial Area	M.S. Wire Drawing with Pickling
17	AGRAWAL PHARMACEUTICALS	B-2644, Narela Industrial Area	FORMULATION OF MEDICINES.
18	AJANTA RUBBER	B-2541, DSIDC, Narela Industrial Area	Manufacturing natural rubber latex Foam Mattresses and Cushions etc
19	AKRITI PRINTERS	B-96/1, Naraina Industrial Area Phase - I	OFFSET PRINTING
20	AL MINI INDIA	B-2417,DSIDC ,Narela Industrial Area	ALUMINIUM DOORS & WINDOW FITTING
21	ALASKA TYRES PVT. LTD.	F-26/3, Phase-II, Okhla Industrial Area	Mfg. of Agricultral Based Products (Rice Rubber Rolls & Rice Polisher)
22	ALFA AUTOMOBILES (INDIA)	7/21, Kirti Nagar Indl. Area	Heat Treatment on Automobiles Parts
23	ALFA-AUTOMOBILES(INDIA)	7/21,Kirti Nagar Industrial Area	Heat treatment on automobile parts.
24	ALIPOR PIPE & STEEL TUBING INDUSTRIES P	M-6, Badli Industrial Estate	Mfg. of copper sheet & circles with acid work

**List of industries which have installed ETP**

**Annexure-III**

25	ALKARMA	57, Najafgarh Road Industrial Area	ENGINEERING WORK WITH ANODIZING AND PHOSPHATING
26	ALPS PRINTERS	C-13, DDA Sheds, Okhla Industrial Area, Phase-I	OFFSET PRINTING INCLUDING WASHING OF PLATES & ROLLERS
27	AMBICA STEELS	B 10/9, Wazirpur Industrial Area	Cold Re rolling & Pickling of S. S. Sheets.
28	AMERICAN SUREIGCO CORPORATION	A-61, Wazirpur Industrial Area	Manufacturing of S. S. Patta/Patti.
29	AMIT (INDIA) NAME PLATE (P) LTD	A-127, Ph-II, Mangolpuri Industrial Area	Mfg. of Name Plates 2 lacs to 3 lacs Pcs with Anodising Activity
30	AMITA OFFSET WORKS	G-940, DSIDC Narela Industrial Area	Printing Press with plate making washing & Binding
31	ANA PRINT O GRAFIX PVT. LTD	DDA Shed, Phase-II, Okhla Industrial Area	Printing
32	ANALYTICAL TESTING SERVICES (UNIT OF	E-47/9, Phase-II, Okhla Industrial Area	mfg. of tablets & syrup
33	ANAND ELECTRO ENGINEERING	B-67/1, Wazirpur Industrial Area	Electroplating work (Nickel and Chrome Plating)
34	ANAND INTERNATIONAL (INDIA)	A- 185, Okhla Industrial Area, phase - I	Mfg. of readymade garments with washing
35	ANAND INTERNATIONAL (INDIA)	D-3, Phase I, Okhla Industrial Area	Mfg. of readymade garments with washing
36	ANAND MOTOR PRODUCTS (P) LTD	M-22, Badli Industrial Estate	MFG OF AUTOMOBILE COMPONENTS
37	ANAND PRINTERS & PACKERS	C-57/1, PH-II, Okhla Industrial Area	Offset Printing including washing of plates, Ink Rollers & Packaging
38	ANAND STEEL	DISDC SHEDNO.-103 Wazirpur Industrial Area	STEEL FABRICATION
39	ANIL METAL INDUSTRIES	A-104/9, Wazirpur, Indl Area	Pickling, Annealing & Re-Rolling
40	ANJANEYA COLD STORAGE LIMITED	B-35, Lawrence Road Industrial Area	Meat Processing
41	ANSUN MULTITECH (INDIA) LTD	B-123, Ph-I, Okhla Industrial Area	Electroplating Industries
42	ANUPAM ART PRINTERS	6/14, Kirti Nagar Industrial Area	OFFSET PRINTING WITH PLATE MAKING
43	APRA AUTO INDIA PVT. LTD	F-85, Ph-I, Okhla Industrial Area	REPAIRING & SERVICING OF VEHICLES.
44	ARAVALI PRINTERS & PUBLISHERS P. LTD	W-30, Phase II, Okhla Industrial Area	Offset Printing including Washing.of Plates, Ink Rollers & Films
45	ARBRO PHARMACEUTICALS	6/14, Kirti Nagar Industrial Area	MFG OF PHARMACEUTICALS FORMULATION TABLETS CAPSULES AND
46	ARC MOTORS PVT LTD	S-9, Phase - II, Okhla Industrial Area	Showroom Cum Service Center for two wheelers
47	ARC MOTORS PVT. LTD.	Plot No. F-25/4, Phase-II, Okhla Industrial Area	AUTOMOBILE SERVICES WASHING & REPAIR WORKSHOP.
48	ARCHANA OFFSET	C-78, Phase-I, Okhla Industrial Area	Offset Printing including Washing of Rollers & Plates
49	ARKAY ENTERPRISES	D-89, Phase-I, Okhla Industrial Area	MFG OF READYGARMENTS (WITH WASHING)
50	AROMA CHEMICAL AGENCIES (INDIA) PVT. LTD.	D-91/4, PHASE-I, OKHLA INDUSTRIAL AREA,	Warehouse and Small Laboratory for testing (In-house only).
51	AROTECK METAL FINISHING WORKS	B-214, PHASE-I.OKHLA INDUSTRIAL AREA	ELECTROPLATING
52	ART MAKERS	C-62/2, Phase II, Okhla Industrial Area	Offset printing including washing
53	ARTI INDUSTRIES	A-97/1, Wazirpur Industrial Area	Pickling Annealing & Re rolling of S. S. Sheets.

**List of industries which have installed ETP**

**Annexure-III**

54	ARUN ELECTROPLATING	B-2305, DSIDC Narela Industrial Area	ELECTROPLATING AND POWDER COATING.
55	ARUN PACKERS AND PRINTERS	C-36 Lawrence Road Industrial Area	offset printing & packaging.
56	ARVIND SPORTS	B-47, PH-II, Mangolpuri Industrial Area	MFG. OF EVA SHEETS (SPORTS GOODS).
57	ASHIRWAD METALLIZERS	Block-2, 50/2, WHS, Kirti Nagar Industrial Area	Metallizing on Plastic Goods
58	ASIAN MOTORS	29, Shivaji Marg, Najafgarh Road Industrial Area	CAR SHOW ROOM AND SERVICE STATION
59	ASIATIC ELECTRICAL & SWITCHGEAR PVT. LTD.	A-58, Naraina Industrial Area, Phase - I	Electrical and Switchgear.
60	ASK ADVERTISING AIDS PVT. LTD.	88, DSIDC COMPLEX PHASE-I, Okhla Industrial Area	Printing.
61	ASTHA PACKING	122, DSIDC Complex, Phase - I, Okhla Industrial Area	OFFSET PRINTING WITH WASHING
62	ATICO TEX PVT. LTD.	70, Rajasthan Udyog Nagar, G.T. Karnal Road	manufacturing of zip fastners (including dyeing)
63	ATUL ENGINEERING CO.	H-8, Udyog Nagar Industrial area	MFG. OF M.S. WIRE DRAWING WITH PICKLING
64	AUTO & GENERAL CASTING (P) LTD.	M-12, Badli Industrial Area	Aluminium Die Casting & Zinc Plating.
65	AUTO CARE	Disst. Centre, Shivaji Place, Najafgarh Road, Rajouri	mfg of automobiles vehicle servicing
66	AUTOVIKAS SALES & SERVICE PVT. LTD.	12-A Shivaji Marg, Najafgarh Road Industrial Area	automobiles workshop and service station
67	AVM INDUSTRIES	B-1, Phase-I, Badli Industrial Estate	M.S. Wire Drawing with Acid wash activity
68	AVTAR REFRIGERATION INDUSTRIES	C-57/1, Wazirpur Industrial Area	Cold re rolling and pickling of s.s. sheets.
69	B.K. Motors & Tractors	A-81, G.T. Karnal Road, Opp. Hans Chnema Industrial Area	Servicing of two wheelers.
70	B.K. STEEL & SONS	A-3/3, Ph-I, Mayapuri Industrial Area	Mfg. of Brigat Steel Bars.
71	B.M. MOTORS	A-45, Phase-II, Mangol Puri, Industrial Area	MFG. OF ELECTRICAL GOODS( CELLING FANS, GYSIERS AND EXHAUST FANS) WITH PHOSPHATING AND POWDER COATING.
72	B.M. POLYMERS	D-1655, Narela Industrial Area	Cutting & Washing of Pvc Scrapes
73	B.R. ENTERPRISES	A - 319, DSIDC Narela Industrial Area	M. S. Wire Drawing With and Acid wash.
74	BAGGA LINK SERVICE LTD	F-90/19, Phase-I, Okhla Industrial Area	SERVICE STATION
75	BAGRRYS INDIA LIMITED	SHED NO. 68, DSIDC COMPLEX Lawrence Road Industrial Area	Food products (muesli)
76	BAHUDUR SINGH & SONS PVT. LTD.	A-28, Lawrence Road Industrial Area	Processed food products (namkeen & Sweets)
77	BAJAJ AUTO WAYS (REGD)	B-65, Wazirpur Industrial Area	Mfg. of Clutch Plates Including Heat Treatment.

**List of industries which have installed ETP**

**Annexure-III**

78	BAJAJ MOTORS	T-5/242, PH-I, Mangolpuri Industrial Area	Manufacturing of Automobile Service and Repair Workshop
79	BAJRANG ELECTROPLATORS	Plot No.220, Pkt-I, Sec-5, DSIDC Complex, Bawana Industrial Area	Electroplating
80	BAJRANGBALI INDUSTRIES	89, Phase-II, Badli Industrial Estate	PICKLING, ANNEALING & RE ROLLING OF S.S. SHEETS
81	BANSAL INDUSTRIES	42, Rajasthani Udyog Nagar Industrial area, G.T. Karnal Road	Galvanizing of Iron Wire
82	BANSAL UDYOG	D-15, S.M.A Industrial Area, G.T. Karnal Road	Mfg. of M. S. Butt Hinges Aluminium Fittings
83	BAS ENGINEERING P. LTD	A-2, Udyog Nagar Industrial area	Servicing and washing of cars.
84	BATRA INDUSTRIES	B-17/1, Ph-II, Okhla Industrial Area	Powder Coating and phosphating
85	BEC POLYPLAST INDU.	C-109,Mayapuri Industrial Area PH II	Mfg. of PVC Pipe & its fitting
86	BEHARI LAL DARSHAL LAL	B-3, Lawrence Road Industrial Area	Manufacturing of Achar & Muraba.
87	BENLON INDIA LTD.	A-68, Group Wazirpur Industrial Area	Dyeing.
88	BENTEX MOTOR CONTROL GEAR INDUSTRIES	B-65/2, Naraina Industrial Area, Phase - II	MFG OF ELECTRIC GOODS
89	BEST LABORATORIES P. LTD	C-53, Ph-II, Okhla Industrial Area	Manufacturing Of Drugs and Medicines
90	BEST PHOTO OFFSET PRINTERS	A-81, DDA SHED, Okhla Industrial Area phase-II	Printing of paper.
91	BHAGWATI PRINTERS (PVT) LTD	33/33 A,Rama Road, Najafgarh Road Industrial Area	OFFSET PRINTING & LATE MAKING (WITH TRADE EFFLUENT)
92	BHAGWATI STEELS	B-25, Wazirpur Indl. Area	Pickling & Re Rolling of S. S. Sheets.
93	BHANDARI MOTORS	B-24, Ph-I, Okhla Industrial Area	Servicing & Repairing of Vehicle
94	BHARAT ENTERPRISES	I-2173, DSIDC, Narela Industrial Area	hand pump parts (zinc plating and (Light Engineering works)
95	BHARAT SMALTING CO.	Sheds No 202, DSIDC, Phase-I, Okhla Industrial Area	MFG OF ZIPS SLIDERS INCLUDING PLATING
96	BHARTI EXPORT	S-78, Badli Industrial Estate, Ph-I	Mfg of Steel Staniture with Golvanizing
97	BHASIN MOTORS (INDIA) PVT LTD	56-B, RAMA ROAD, Najafgarh Road Industrial Area	servicing of vehicals.
98	BHAWANI INDUSTRIES	B-62/1, Wazirpur Indl. Area	Pickling & Re rolling of S. S. Sheets.
99	BHOLA METALS	F-49, Ph-II, Mayapuri Industrial Area	Anodizing Work
100	BIO LABORATORIES	I-2118, DSIDC Narela Industrial Area	MFG. OF EXTERNAL APPLICATION & REPACKING DRUGS & CHEMICALS
101	BIRD AUDIO INDIA PVT. LTD	S-35, BADLI INDUSTRIAL ESTATE	TELEVISION PARTS WITH ELECTROPLATING & POWDER COATING
102	BITTOO BIKEWALA PVT. LTD.	D-19/1, Phase-II, Okhla Industrial Area	Service station of bikes.
103	BITTU INDUSTRIES	WH-78, Phase-I, Mayapuri Industrial Area	Heat treatment with quenching of ironparts.
104	BOUTIQUE CLOTHING CO. PVT. LTD.	D-1/5, Phase-II, Okhla Industrial Area	mfd of garments

**List of industries which have installed ETP**

**Annexure-III**

105	BOUTIQUE INTERNATIONAL PVT. LTD	D-14/1, Phase-II, Okhla Industrial Area	MFG OF READYMADE GARMENTS
106	BRIGHT ELECTROPLATERS	C-85, Phase-II, Mayapuri Industrial Area	JOB WORK OF ELECTROPLATING
107	BRIGHT ELECTROPLATING IND.	C-5/2, Wazirpur Industrial Area	ELECTROPLATING
108	BRIGHT INDIA INDUSTRIES	C-9/3, Wazirpur Industrial Area	Manufacture of Stainless Steel Sheets.
109	BRIJ MOHAN RAM MOHAN	A-86/2, Wazirpur Industrial Area	Pickling & Re Rolling of S. S. Sheets
110	BRITANNIA INDUSTRIES LTD	33, Lawrence Road Industrial Area	Biscuit Manufacturing
111	BTW INDIA PVT. LTD.	A-14, LAWRENCE ROAD INDUSTRIAL AREA	PREPARATION OF FOOD ITEMS FOR OUTDOOR CATTERING.
112	BYLANE OVERSEAS PVT. LTD.	C-77, Ph-I, Okhla Industrial Area	Printing.
113	C.S. ENGINEERING	B-2, PH-III, DSIDC COMPLEX Badli Industrial Estate	METAL POLISHING AND ELECTROPLATING WORK.
114	CALIBRIGHT	A-42, Gate No.1, Phase-II, Mayapuri Industrial Area	Readymade garments with washing
115	CAMBRIDGE PRINTING WORKS.	B-85, Naraina Industrial Area Phase - II	PAPER PRINTING BY OFFSET MACHINE AND PLATE MAKING WITH TRADE EFFLUENT
116	CANCO FASTENERS	A-43, G.T. Karnal Road Industrial Area	zinc plating of fasteners
117	CAPIL & SACHIN ALLOYS	Y-50, PH-II, Okhla Industrial Area	SHEET METAL WORK AND POWDER COATING
118	CAPITAL METAL INDUSTRIES	M-25, Badli Industrial Estate, Phase-I	RE-ROLLING & PICKING OF COPPER BRASS SHEET
119	CAPITAL THREAD HOUSE	Plot No.-83, Sector-2, Pocket No.-O, Bawana Industrial Area	Rewinding of Thread ad yarn.
120	CARTON & CONTAINERS INDIA PVT. LTD.	B-6, G.T. Karnal Road Industrial Area	MFG. OF TIN CONTAINERS WITH PRINTING.
121	CAVANDISH INC	D-4, UDYOG NAGAR, NEAR PIRAGARHI CHOWK	BANQUET HALL
122	CELEBRATION RESTAURANT/BANQUET	A-16/3, Wazirpur Industrial Area	Comlex shall be a Banquet Hall
123	CHAMAN TECHNICKS PVT LTD.	F-90/17, Phase-I, Okhla Industrial Area	HARD CHROME PLATING (JOB WORK)
124	CHARU MOTORS PVT. LTD	69/1A , Najafgarh Road Industrial Area	Repairing and Servicing of cars.
125	CHARU MOTORS PVT. LTD.	A-69, Naraina Industrial Area Phase - I	REPAIRING AND SERVICING DENTING AND PAINTING OF CARS
126	CHEISEA PRODUCTS	C-107, Naraina Industrial Area Phase - I	Dyeing and Bleaching of Garments
127	CHELSEA MILLS	B-78, Mayapuri Industrial Area	Bleaching & Dying of Garments
128	CHEMO BIOLOGICAL	A-50, G.T. Karnal Road Industrial Area	Mfg of capsule & tablets(pharmaceuticals)
129	CHEMO DRUGS AND CHEMO REMEDIES	A-50, G.T. Karnal Road Industrial Area	Manufacturing of Pharmaceutical products (Capsules Tablets and syrups)
130	CHEMTECH	I-2097, D S I D C, Narela Industrial Area	Printing shell/cylenders
131	CHMAN ENGG WORKS	G-1/37, G.T. Karnal Road Industrial Area	Mfg of Job Works & Hard Anodising.

## List of industries which have installed ETP

## Annexure-III

132	Choprasons	Plot No B-73, GTK Road Industrial Area	Car Service Centre
133	CITY CAR CARE	10/57, Kirti Nagar Industrial Area	SERVICING OF VEHICLES(CAR WASHING & SPRAY PAINTING)
134	CIVIL DRUG LABORATORIES	114, Ph-II, Badli Industrial Estate	Mfg. of Medicines Formulation.
135	CLASSIC FASHION	D-80, Phase-I, Okhla Industrial Area	Cutting the Raw Cloth as per Design and then Stitching is done
136	COAT WELL INDIA PVT LTD	42, DLF Industrial Area, Kirti nagar	Electro plating.
137	COLOUR IMPEX	217-218, Phase-I Okhla Industrial Area	Dyeing & washing of garments
138	COLOUR IMPRESSION	C-171, Phase I, Okhla Industrial Area	Dyeing and washing of garments
139	COMMERCIAL SERVICE STATION	C-124, Naraina Industrial Area Phase - I	Repair & Service of Cars
140	COMRACK INFONET PVT. LTD	C-176, 177, Phase-I, Okhla Industrial Area	MFG. OF S.S CABINET
141	CONTINENTAL DEVICE INDIA LIMITED	C-120, Naraina Industrial Area Phase - I	MFG OF ELECTRONIC SEMIC CONDUCTOR
142	COOPER PHARMA	B-29, Wazirpur Industrial Area	Formulation of drugs & medicines
143	COSMIQUE GLOBAL	A-17, Naraina Industrial Area, Phase-II	MFG. OF HOME FURNISHING TIEM
144	COSMO METAL FINISHING CO.	T-31, Okhla Industrial Area, Phase II	METAL FINISHING WORK.
145	COTTEX DYEING	D-98, Phase-I, Okhla Industrial Area	Dyeing and washing of garments
146	CPL AUTOS (P) LTD.	S-47, Phase-II, Okhla Industrial Area	Washing and servicing of vehicles.
147	CREATIVE EDGE MENS WEAR	49, Rajasthan Udyog Nagar Industrial Area GT Karnal Road	Mfg. of readymade garments without washing & dyeing
148	CREATIVE IMPEX	C-55/2, Ph-II, Okhla Industrial Area	Mfg. OF READYMADE GARMENTS WITH WASHING.
149	CRISS - O - CROSS	B-310 , Ph-1, Okhla Industrial Area	manufacturing of readymade garments madeups and home furnishing including washing.
150	CYPER DRUGS AND PHARMACEUTICS (P) LTD	63, RAMA ROAD Najafgarh Road Industrial Area	Manufacturing of Alopactic Capsules
151	CYPER PHARMA	63, RAMA ROAD, Najafgarh Road Industrial Area	Manufacturing of Alopactic Tablets
152	D.B. ENTERPRISES	7/26, Kirti Nagar Industrial Area	MFG OF BLADES AND OTHER PARTS OF DOMESTIC MIXER GRINDER WITH
153	D.D. MOTORS (A DIV. OF D.D. INDUSTRIES LTD)	B-8, Phase-I Mayapuri Industrial Area	Servicing & Repairing of Automobiles Vehicles.
154	D.D. MOTORS (A DIV. OF D.D. INDUSTRIES LTD.)	6, Wazirpur Industrial Area	Repairing servicing and denting painting & washing.
155	D.D. MOTORS (A DIV. OF D.D. INDUSTRIES LTD)	5, Wazirpur Industrial Area	Sale Service & Spares of Marutis

**List of industries which have installed ETP**

**Annexure-III**

156	D.D.MOTOR	69/4-A Najafgarh Road Industrial Area	Automobile Workshop Cum Service Station
157	D.D.MOTORS (DIVISION OF DD INDUSTRIES LTD)	A-1 UDYOG NAGAR INDUSTRIAL AREA	SHOWROOM REPAIR AND SERVICE AUTOMOBILE
158	D.S. FINISHING	A-82, Ph-I, Naraina Industrial Area Phase - I	mfg of readymade garment jewelery with washing and electroplating
159	DABBU PLASTIC	Plot no. 32, Sector-5, pkt-A, Bawana Industrial Area	Cutting & Grinding of plastic waste (with Washing)
160	DADU AQUA DRINKS(INDIA) PVT LTD.	Plot No. A-178, DSIDC Narela Industrial Area	Packaging of drinking water.
161	DARSHAN TRADING CO	C-34, Lawrence Road Indl Area	MEAT PROCESSING UNIT WITH COLD STORAGE FACILITIES.
162	DAYAL METAL INDUSTRIES	28, PKT-F, SEC-4, DSIDC COMPLEX Bawana Industrial Area	Engineering works with electroplating and buffing
163	DBDN INDUSTRIES	Plot No 113 , Pocket-O , Sec-2 , Bawana Industrial Area	Galvanising Of Auto parts
164	DECENT AUTOMOBILES	A-13, Phase-I, Mayapuri Industrial Area	Car Servicing & Repairing.
165	DEEP (INDIA) ENTERPRISES PVT LTD	60, GTK, S.S.I Industrial Area	Servicing & Washing Of Vehicles
166	DEEP (INDIA) ENTERPRISES PVT LTD	B-72/4, Wazirpur Industrial Area	Servicing Station.
167	DEEPAK INDUSTRIES	H-1165, DSIDC Narela Industrial Area	Wire Drawing Unit
168	DEEPAK INDUSTRIES	A-83/5, Wazirpur Industrial Area	Stainless steel re rolling Annealing & Pickling
169	DEEPIKAJ INDUSTRIES	D-23, SMA INDUSTRIAL AREA	Pickling-Others
170	DELHI CHROME WELL	C-13, DSIDC Nangloi Industrial Area COMPLEX	Hard Chrome Plating
171	DELHI DYEING MILLS	C-53, Phase-II, Mayapuri Industrial Area	JOB WORK OF DYEING OF GREY CLOTH
172	DELHI JOBWORKS	B-6, Group, Wazirpur Industrial Area	Pickling & Re rolling of S. S. sheets.
173	DELHI METAL INDUSTRIES	77 S.S.I. Co-op Indi. Estate, G T K Road	Pickling Annealing & Re rolling of S. S. Sheets
174	DELHI TRANSPORT CORPORATION CENTRAL	Okhla, phase-1 Okhla Industrial Area	DTC Control workshop-II
175	DELITE KOM LTD	B-233, Phase-I, Okhla Industrial Area	Mgf. of steel furniture.
176	DENIM CARE CO.	B-95, Okhla Industrial Area, Phase 1	Dyeing and washing of readymade Garments
177	DENIM WASH COMPANY	C-173A Okhala Industrial Area, Phase-I	Deyeing & Washing.
178	DETAILS	D-30, PH-I, Okhla Industrial Area	MANUFACTURING OF READYMADE GARMENTS WITH WASHING.
179	DEV STEELS	A-19,Wazirpur Industrial Area	Pickling & Re rolling of S. S. Sheet

**List of industries which have installed ETP**

**Annexure-III**

180	DHINGRA AUTOMOBILES	K-54, Udyog Nagar Industrial Area, Rohtak Road	DENTING AND PAINTING REPAIRING SERVICING WITH WASHING OF TWO WHEELERS
181	DHINGRA COLD STORAGE (DEEP FREEZER)	C-14, Ph-I, Okhla Industrial Area	Cold Store (Deep Freezer)
182	DIAMOND PLATERS	C-310, Phase II, Mayapuri Industrial Area	Electroplating Job Work
183	DIGITAL GRAPHICS INDIA PVT LTD	F-90/12, Phase I, Okhla Industrial Area	Offset printing with Film Processing Plate Making and Roller Washing.
